

Support H.R. 2026 – The Pharmaceutical Information Exchange (PIE) Act

Improving Patient Access to Medications by Changing How Clinical Trial Information Is Shared

THE SOLUTION: H.R. 2026 - THE PIE ACT

A bill in Congress that would allow for clinical trial information to be shared with payers and insurers earlier so they can:

- Make decisions about covering patient medications, faster, earlier and more accurately following FDA approval
- Help expedite patient access to therapies
- Lay the groundwork early for value-based care and reimbursement models

H.R. 2026 adheres to the existing FDA approval process to ensure medications are safe and effective. The passage of H.R. 2026 into law would ensure that earlier decisions are made for all patients.
